DOC at Selected MWQI Stations:

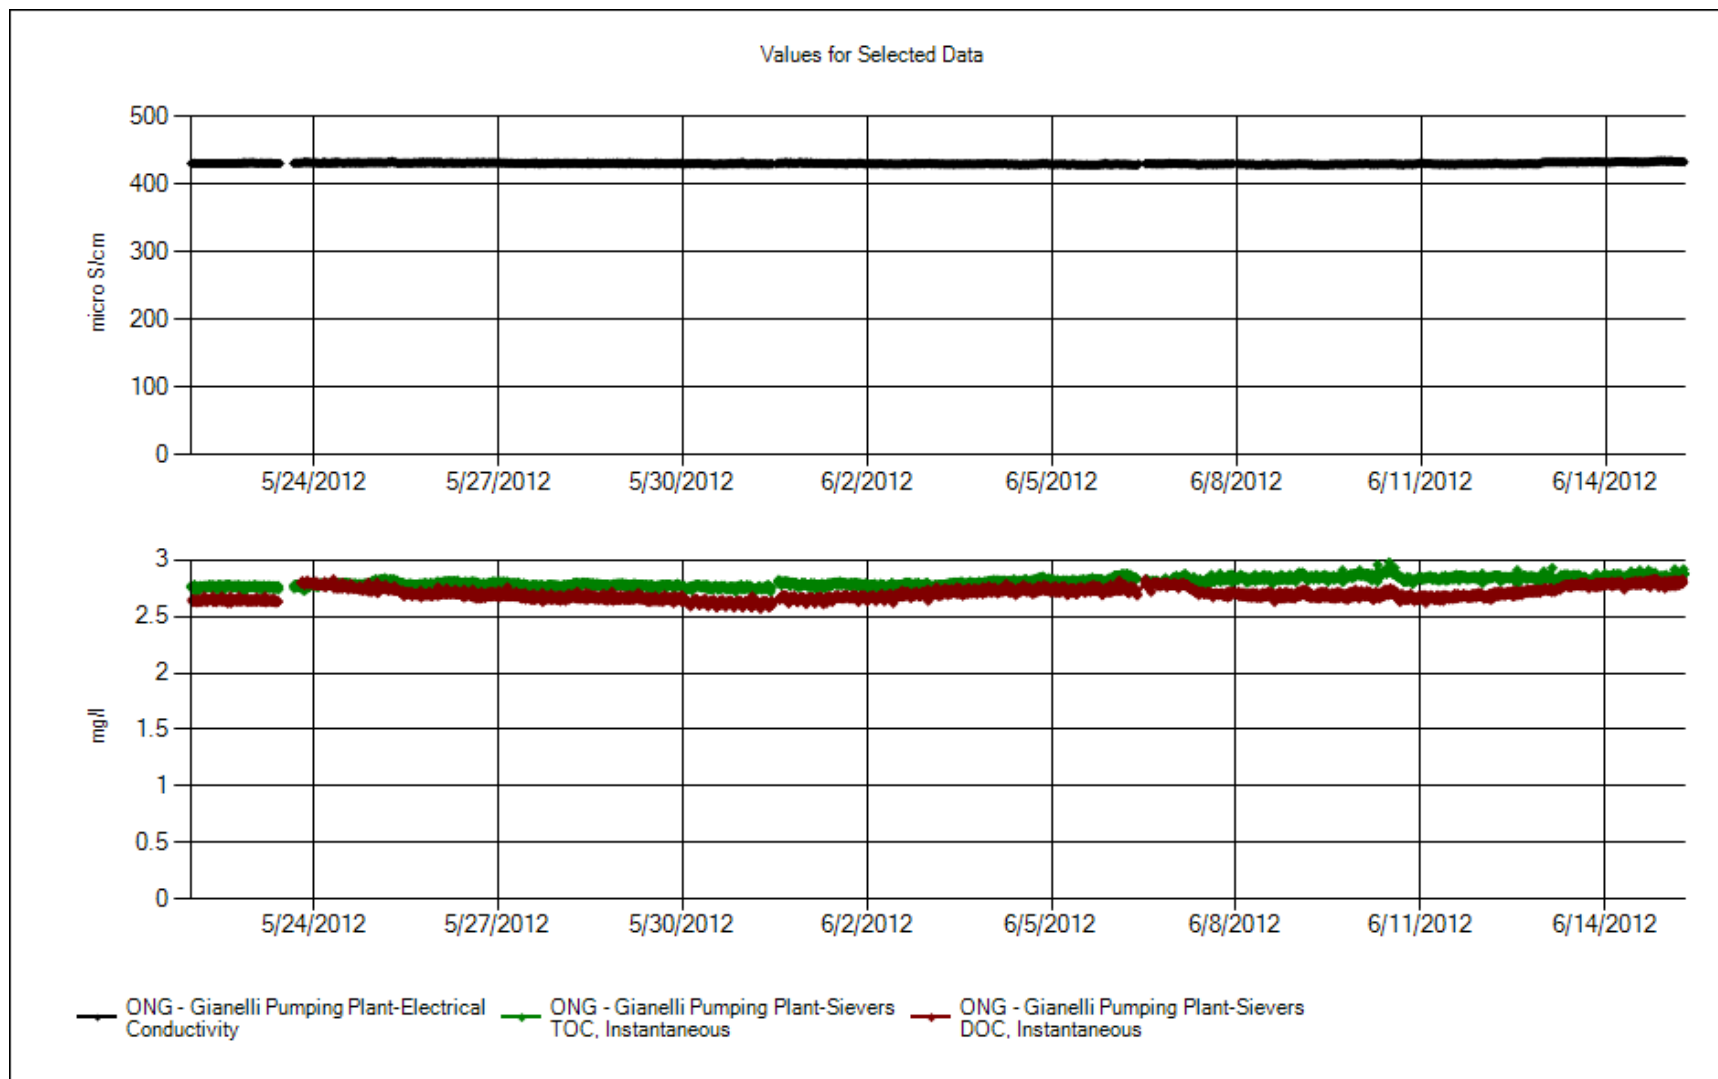

Chloride at Banks, Jones, and Vernalis:

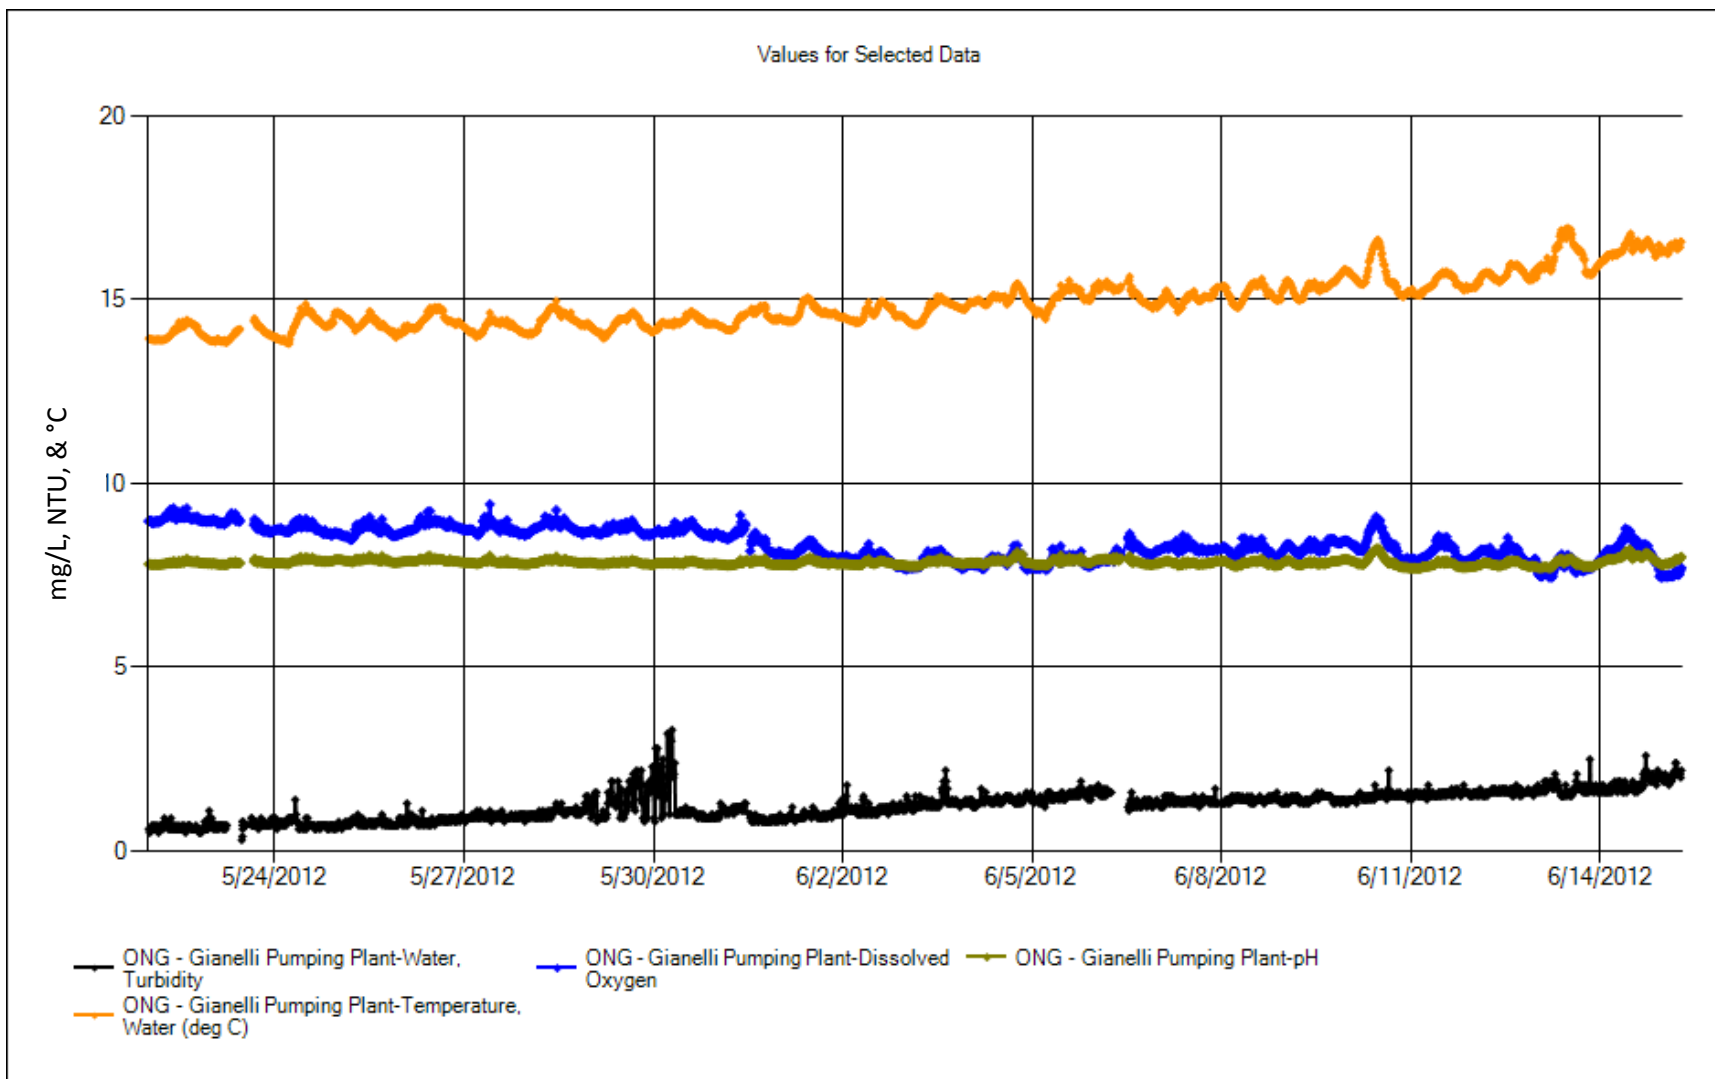

Bromide at Banks, Jones, and Vernalis with operation details:

Gianelli EC & OC

Gianelli ph, DO, Turbidity, & Temp

Significant Events

5/23 – YSI calibration

Routine calibration. All pre-calibration values were within accuracy limits.

6/6 – Metrohm anion analyzer installed

The instrument was brought down to the station on 5/31 and a representative from Metrohm came on the 6th to set it up. There are still few minor changes that need to be made before the data can go online.
